Abstract: This paper reports the results of the curation of specimens of Dryophthorinae (Coleoptera: Curculionidae) housed in the Entomological Collection of the Museu Paraense Emílio Goeldi (MPEG), Belém, state of Pará, Brazil. The Collection holds a total of 1,071 specimens, with 90% of them previously unidentified. We reviewed all specimens and identified them to species level, resulting in 16 genera and 32 species of Dryophthorinae. These include the type specimens of three species: *Cyrtomasius marluciae* Vanin, 1998; *Foveolus maculatus* O'Brien, 2003; and *Paramasius cristulatus* Vanin, 1998. The genus *Rhodobaenus* Le Conte, 1876 was recorded for the first time to Brazilian Amazon. All specimen data were digitized and are now publicly available. Currently, 50% of the richness of the Dryophthorinae recorded from Brazilian Amazon is present in the Collection. The occurrence and the species richness of the Dryophthorinae examined are shown on a map. All labels contents and remarks to type material are presented. High resolution photographs of the primary types are also provided. The material examined represents a temporal and spatial record of Amazonian Dryophthorinae.

Keywords: Weevil. Richness. Taxonomy. *Cyrtomasius*. *Paramasius*. *Foveolus*.

Resumo: Este artigo reporta os resultados da curadoria dos espécimes de Dryophthorinae (Coleoptera: Curculionidae) depositados na Coleção Entomológica do Museu Paraense Emílio Goeldi (MPEG), Belém, Pará, Brasil. O acervo soma 1.071 exemplares, sendo que 90% deles não tinham sido identificados anteriormente. Nós revisamos todos os espécimes e os identificamos em nível de espécie, resultando em 16 gêneros e 32 espécies de Dryophthorinae. Estes incluem os espécimes-tipo de três espécies: *Cyrtomasius marluciae* Vanin, 1998; *Foveolus maculatus* O'Brien, 2003; e *Paramasius cristulatus* Vanin, 1998. O gênero *Rhodobaenus* Le Conte, 1876 foi registrado pela primeira vez na Amazônia brasileira. Todas as informações presentes nas etiquetas do material estudado foram digitadas e agora estão disponíveis para consulta. Atualmente, 50% da riqueza de espécies de Dryophthorinae registrada na Amazônia brasileira está representada na coleção. A ocorrência e a riqueza de espécies de Dryophthorinae registradas na coleção são apresentadas em um mapa. Todas as informações das etiquetas do material estudado e os comentários sobre o material-tipo são fornecidos. Fotografias de alta resolução dos tipos estudados também são fornecidas. O material examinado representa um registro temporal e espacial de Dryophthorinae da Amazônia.

Palavras-chave: Gorgulho. Riqueza. Taxonomia. *Cyrtomasius*. *Paramasius*. *Foveolus*.

INTRODUCTION

Curculionidae Latreille, 1802 is one of the most diverse groups of insects, with about 4,600 genera and 51,000 described species in the world (Oberprieler *et al.*, 2014). Even though one of the most recognizable families of Coleoptera, the classification of the subfamilies and tribes of Curculionidae remains highly controversial (about classification within Curculionidae, e.g. Kuschel, 1995; Marvaldi & Morrone, 2000; Marvaldi *et al.*, 2002; McKenna *et al.*, 2009, 2018; Shin *et al.*, 2018). As an exception to the rule, Dryophthorinae Schoenherr, 1825 is one of the few well-defined groups within Curculionidae, supported both by molecular and morphological data (Kuschel, 1995 as Rhynchophorinae; Marvaldi, 1997 as Rhynchophorinae; Marvaldi & Morrone, 2000; Anderson, 2002a; Marvaldi *et al.*, 2002; Oberprieler *et al.*, 2007; Anderson & Marvaldi, 2014; McKenna *et al.*, 2009; Jordal *et al.*, 2014; Shin *et al.*, 2018).

Dryophthorinae (the subfamilies's content is equal to that of "Dryophthoridae" by Alonso-Zarazaga & Lyal, 1999, 2002a; and Bouchard *et al.*, 2011) consists about 1,200 species in 153 genera and five tribes: Cryptodermatini, Dryophthorini, Stromboscerini, Orthognathini (with two subtribes) and Rhynchophorini (with six subtribes) (Marvaldi & Morrone, 2000; Oberprieler *et al.*, 2007; Morrone & Cuevas, 2009). Their species are mainly associated with monocots (Anderson, 2002a; Marvaldi *et al.*, 2002; McKenna *et al.*, 2009), and some species are major pests of various globally important agricultural products (Silva *et al.*, 1968; Chamorro, 2019).

In South America are recorded 27 genera of Dryophthorinae (Wibmer & O'Brien, 1986; Vanin, 1998; Alonso-Zarazaga & Lyal, 1999, 2002a), which of 17 were taxonomically studied. Thereby, all the richest genera (*Metamasius* Horn, 1873; *Mesocordylus* Lacordaire, 1866; *Sphenophorus* Schoenherr, 1838; and *Rhodobaenus* Le Conte, 1876) were reviewed by Vaurie (1966, 1967b, 1970b, 1978, 1980) including *Cactophagus* Le Conte, 1876 and *Paramasius* Kuschel, 1958 (as species group of *Metamasius*; see Vaurie, 1966, 1967a). Other four genera with less richness

(*Belopoeus* Schoenherr, 1838; *Rhinostomus* Rafinesque, 1815; *Orthognathus* Schoenherr, 1838; and *Scyphophorus* Schoenherr, 1838) were also reviewed by Vaurie (1968c, 1970a, 1970b, 1971). Additionally, she described *Foveolus* Vaurie, 1968 and furnished an identification key to its species (Vaurie, 1968b). Other important studies were the review of *Rhynchophorus* Herbst, 1795 and *Dynamis* Chevrolat, 1883 (Wattanapongsiri, 1966) and, more recently, the description of the genus *Cyrtomasius* Vanin, 1998 (Vanin, 1998) besides the review of *Melchus* Lacordaire, 1866 (Anderson, 2003), *Eucalandra* Faust, 1899 (Anderson, 2008a) and *Alloscolytroproctus* Hustache, 1929 (Anderson, 2008b). The remaining of the genera of Dryophthorinae from South America is represented by one to four species in the region, moreover some of them can be identified by a species key (e.g. Kuschel, 1961 to species of *Sitophilus* Schoenherr, 1838) or by an identification key present in the taxonomic reviews cited above.

The Entomological Collection of the Museu Paraense Emílio Goeldi (MPEG), located in Belém, Pará, Brazil, represents the second oldest entomological depository in Brazil (Costa *et al.*, 2000). This centenary Collection includes more than 11,000 mounted non-type specimens of Curculionidae, of which about 50% have been identified to genus or species level, summing 216 genera and 149 species (Costa *et al.*, 2000; Valente *et al.*, 2005). Additional information on the Collection is available at MPEG (n. d.). The Dryophthorinae are represented by type specimens of three species, and 90% of the remaining specimens housed in the Entomological Collection at MPEG remained until now unidentified.

Herein, we summarize the diversity of Dryophthorinae housed in the Entomological Collection at MPEG, including the identification to the species level for all of the specimens. Following a recommendation of the International Code of Zoological Nomenclature (ICZN, 1999, p. 72F.4), we also include type specimens of Dryophthorinae deposited in this Collection, providing photographs and relevant taxonomic notes.

MATERIAL AND METHODS

We examined type and non-type specimens of Dryophthorinae housed in the Entomological Collection of the Museu Paraense *Emílio Goeldi*. Identification relied on published genus and species-group level reviews (Anderson, 2002b; Vaurie, 1966, 1967a, 1967b, 1968a, 1968b, 1968c, 1970a, 1970b, 1977, 1978, 1980; Wattanapongsiri, 1966), original descriptions and comparison with previously identified material from this Collection. Type specimen's current status was verified by the following databases: Catalogue of Life (Roskov et al., 2020); Electronic Catalogue of Weevil Names of Curculionoidea (Alonso-Zarazaga & Lyal, 2002b); and Taxonomic Catalog of the Brazilian Fauna (Vanin et al., 2020). Species are ordered by tribes, subtribes and genera in alphabetical order, according to the classification proposed by Alonso-Zarazaga & Lyal (1999) with modifications by Marvaldi & Morrone (2000). The names of genera and species are followed by author(s) and year of publication.

The following data are provided for type specimens: bibliographic references, number of total specimens examined, category of types, sex when it is indicated, code-number of MPEG, and all labels contents in verbatim. Backslash indicates a line break, square brackets enclose the contents of a single label and double quotes enclose all the labels for a given specimen. In the remarks, there is additional information on specimens. For non-type specimens the following data are provided: the total number of specimens examined, country, state, city, locality (when indicated), date, biological information (when indicated), collectors (when indicated) and number of specimens examined. Additional information (not originally present in the labels) are enclosed in square brackets. The repeated information was removed and indicated by "same data". The section "Occurrence (MPEG Collection)" presents only the contents from the database provided in this study. All specimens examined received a code-MPEG COL follow by a number of eight digits, according to the present rules of the MPEG Entomological Collection. Label contents were added to the Collection database available at GBIF and MPEG (n. d.).

The map of occurrence and species richness of Dryophthorinae deposited in the MPEG Entomological Collection was generated from the database provided in this study. Data occurrence not found or, limited to the name of the country or state were not recorded on the map, which were indicated by asterisk (*) in the material examined.

Photographs of the holotypes and paratypes were made using a digital camera DFC420 attached to a Leica MZ16 magnifying stereoscope. Leica LAS (Leica Application Suite V4.6.1) and Helicon Focus (version 6.0.18) software were used to assemble the series of images taken at different focus distances by z-stacking method.

RESULTS AND DISCUSSION

A total of 1,071 Dryophthorinae specimens were examined belonging to 16 genera and 32 species (Table 1), including type specimens of three species: *Cyrtomasius marluciae* Vanin, 1998 (Paratype, Figure 1), *Foveolus maculatus* O'Brien, 2003 (Paratype, Figure 2), and *Paramasius cristulatus* Vanin, 1998 (Holotype, Figure 3). In this study, 934 specimens were identified and represented an increase of 13 species to Dryophthorinae richness in the Entomological Collection at MPEG. Two specimens of *Sphenophorus* were identified as two morphotypes and seven specimens of *Metamasius* remain unidentified at species level. The remaining 128 specimens were previously identified in 19 species by the specialists D. R. Whitehead, S. A. Vanin and C. W. O'Brien. All material examined is listed below.

In Brazil, Dryophthorinae is represented by species classified in the Orthognathini and Rhynchophorini tribes, summing 90 species in 22 genera (see Wibmer & O'Brien, 1986; Vanin, 1995, 1998; Alonso-Zarazaga & Lyal, 1999; O'Brien, 2003). Among them, 61 species in 20 genera (except *Eucalandra* and *Rhodobaenus*) have been recorded from Brazilian Amazon (Table 1). Therefore, the Entomological Collection at MPEG includes 50% of the species richness of the Dryophthorinae recorded from Brazilian Amazon. Considering only this fauna, five genera are fully represented also five genera are absent in the Collection (Table 1).

The genus *Rhodobaenus* was recorded for the first time to Brazilian Amazon while the genus *Sphenophorus* was recorded for the first time in the MPEG Entomological Collection. In the Brazilian Amazon are known five species as endemic to the region (Table 1): *Belopoeus orbignyae* Bondar, 1954; *Belopoeus heikeae* Vanin, 1995; *C. marluciae*; *F.*

maculatus and; *P. cristulatus* (Wibmer & O'Brien, 1986; Vanin, 1995, 1998; O'Brien, 2003), of which only *B. orbignyae* and *B. heikeae* are absent in the Collection. The richest genera in the Collection were *Metamasius* and *Mesocordylus* (both with six species), and the most abundant species were *Metamasius hemipterus* (Linnaeus, 1758) (390 specimens)

Table 1. Number of species of Dryophthorinae known for the Brazilian Amazon, known as endemic to Brazilian Amazon, and number of species represented in the MPEG Entomological Collection. Notation: (-) = none; (*) = morphotypes not included in the total.

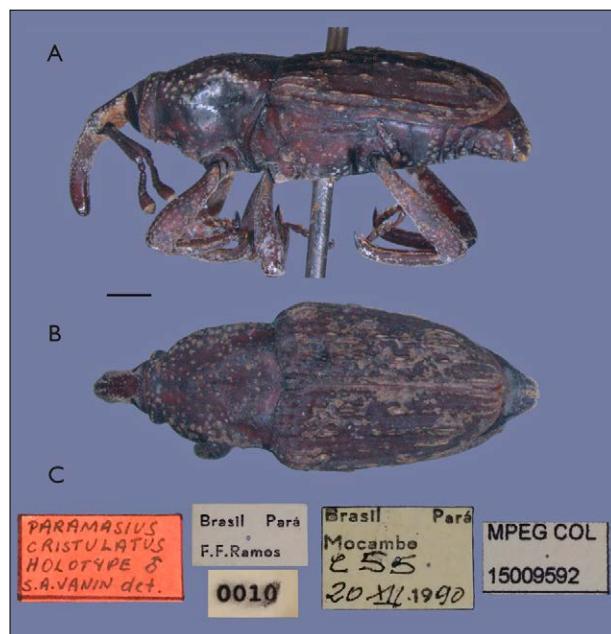

Figure 3. Holotype male of *Paramasius cristulatus* Vanin, 1998: A) lateral view; B) dorsal view; C) labels. Scale = 1 mm.

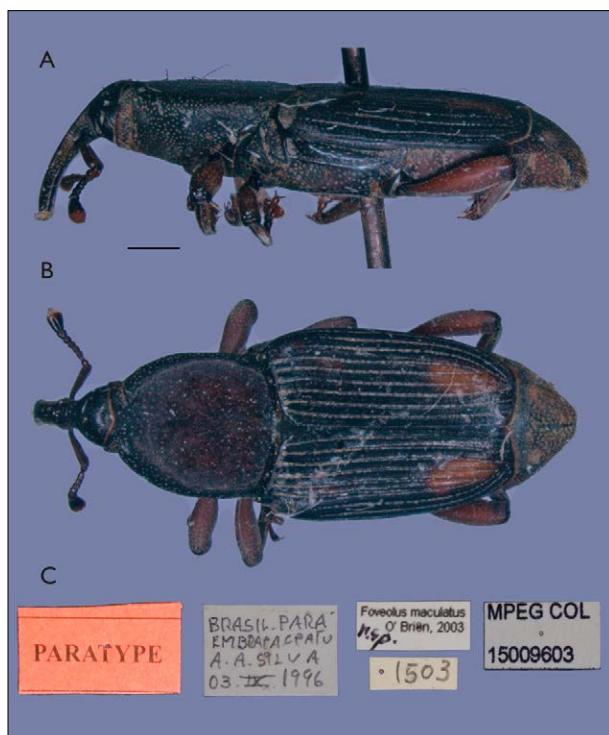

Figure 2. Paratype female of *Foveolus maculatus* O'Brien, 2003: A) lateral view; B) dorsal view; C) labels. Scale = 1 mm.

and *Rhynchophorus palmarum* (Linnaeus, 1758) (389 specimens). In contrast, five species were represented by a single specimen each (see the list below).

Many of specimens examined were collected casually, so little biological or ecological information have been recorded on them. Exceptions are cited to specimens of *Dynamis borassi* (Fabricius, 1801); *Rhynchophorus palmarum*; *Belopoeus carmelita* Gyllenhal, 1838; *Belopoeus caudatus*; *Foveolus anomalus* Vaurie, 1968; *Foveolus maculatus* and *Metamasius hemipterus* on several palms and; *Cyrtomasius marluciae* and *Paramasius cristulatus* on *Clusia* (see the list below).

The material examined was collected exclusively in Brazil (from 90 municipalities from 13 states), especially from the state of Pará (from 40 municipalities) (Figure 4). The highest value of the species richness of Dryophthorinae in the MPEG Entomological Collection was also recorded from the state of Pará (29 species), followed by the states of Amazonas and Mato Grosso (both with eight species) (Figure 4). These occurrences do not necessarily represent the geographic distribution of the species, they are mainly

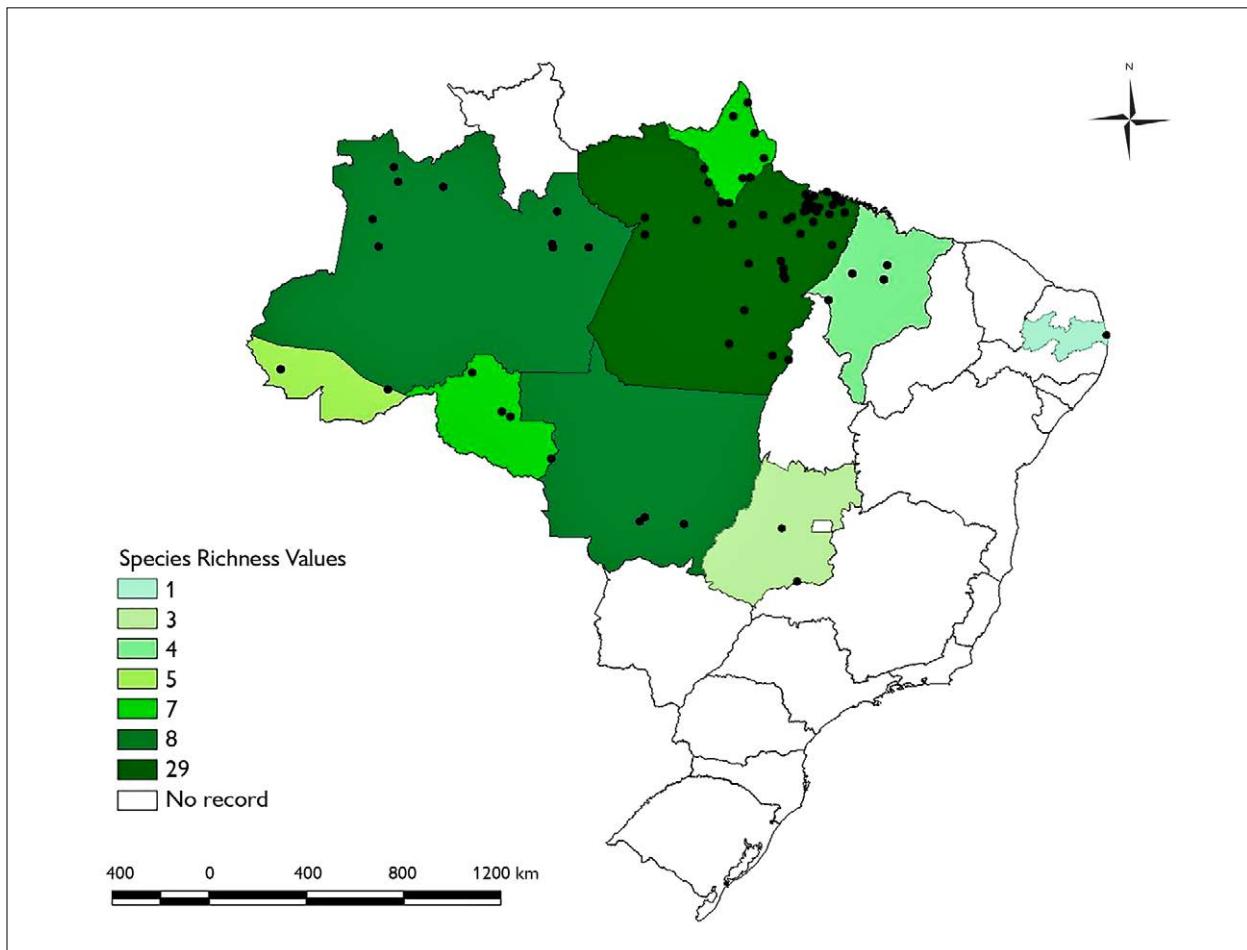

Figure 4. Occurrence and species richness of the Dryophthorinae deposited in the MPEG Entomological Collection. Points indicate the localities recorded in the material examined.

the result of surveys carried out over the years by the staff of MPEG. Nevertheless, the material examined also includes specimens from regions already affected by human intervention, especially from Belém, Tucuruí, and Parauapebas, all in the state of Pará. Besides specimens collected by Adolpho Ducke in the early 1900's and, Walter Egler, Jan Karel Bechyné, and Bohumila Springlová Bechyné in the early 1960's. Thereafter, a significant amount was added to the Collection as result of the surveys conducted by the staff of MPEG in the 1970-1990's, specially Drs. Bento Melo Mascarenhas, William Leslie Overal, and Inocêncio de Sousa Gorayeb, together the assistants: Ramiro Bittencourt

Neto, Waldemar Miranda da Silva França, Francisco Ferreira Ramos, Maria Fernanda Pinto Torres, Márcio Zanuto, and José Orlando Dias.

LIST OF SPECIES OF DRYOPHTHORINAE IN THE MPEG ENTOMOLOGICAL COLLECTION

Curculionidae
Dryophthorinae
Orthognathini
Orthognathina
Mesocordylus Lacordaire, 1866

Mesocordylus apiciclava Vaurie, 1970

Material examined: 1 specimen. Brazil: Rondônia: Ji-Paraná, Fazenda Sinueira, 29-IX-1989, M. Zanuto Coll. (1).

Occurrence (MPEG Collection): Brazil: Rondônia (Ji-Paraná).

Mesocordylus cerinus Vaurie, 1970

Material examined: 2 specimens. Brazil: Pará: Parauapebas, Caldeirão, Serra Norte, 27-X-1984, M.F. Torres Coll. (2).

Occurrence (MPEG Collection): Brazil: Pará (Parauapebas).

Mesocordylus papulatus (Fahraeus, 1845)

Material examined: 1 specimen. Brazil: Amazonas: Manaus, 1 km W Tarumã, 2-III-1981, C. Young Coll. (1).

Occurrence (MPEG Collection): Brazil: Amazonas (Manaus).

Mesocordylus scutellaris (Erichson, 1847)

Material examined: 2 specimens. Brazil: Acre: Porto Acre, Humaitá, Mata de Terra Firme, 15-VI to 2-VII-1992, I. S. Gorayeb & J.A. Pena Colls (1). Pará: Benevides, 23-III-1993, J.A. Pena Coll. (1).

Occurrence (MPEG Collection): Brazil: Acre (Porto Acre); Pará (Benevides).

Mesocordylus striatus (Boheman, 1838)

Material examined: 8 specimens. Brazil: Maranhão: Lago Verde, 8-II-1983, R.B. Neto Coll. (1); Lago Verde, 2-III-1983, W. França Coll. (1). Mato Grosso: Barra dos[do] Bugres, R. E. Serra das Araras, 23-24-I-1986, M. Zanuto Coll. (1). Pará: [without municipality], [?]-[?]-1900, Ducke Coll. (1); Belém, Utinga, 10-I-1978, M.F. Torres Coll. (1); Bragança, 15-I-1978, J. Batista Coll. (1); Peixe-Boi, 13-IV-1977, M.F. Torres Coll. (1); Tucuruí, Rio Tocantins, margem direita, Chiqueirinho, 3-IV-1984, F.F. Ramos Coll. (1).

Occurrence (MPEG Collection): Brazil: Maranhão (Lago Verde); Mato Grosso (Barra do Bugres); Pará (Belém, Bragança, Peixe-Boi, Tucuruí).

Mesocordylus subulatus (Germar, 1824)

Material examined: 1 specimen. Brazil: Pará: Paragominas, Fazenda Cachoeira do Rio Vermelho, 15-I-1991, P. Tadeu Coll. (1).

Occurrence (MPEG Collection): Brazil: Pará (Paragominas).

Orthognathus Schoenherr, 1838

Orthognathus lividus Gyllenhal, 1838

Material examined: 8 specimens. Brazil: Goiás: Corumbá de Goiás, 3-I-1962, J. & B. Bechyné Cols (1); same but, 4-II-1962, (1). Mato Grosso: Chapada dos Guimarães, Fazenda Buriti, 17-II-1982, M. Zanuto & W. Overal Colls (2), same but, 16-II-1982, W.L. Overal Coll. (1). Pará: Parauapebas, Serra Norte, N3, Armadilha Malayse, 9-12-II-1985 (1); Parauapebas, Serra Norte, Caldeirão, com luz, M.F. Torres Coll. (1); Pará: Parauapebas, Serra Norte, N1 (1).

Occurrence (MPEG Collection): Brazil: Goiás (Corumbá de Goiás); Mato Grosso (Chapada dos Guimarães); Pará (Parauapebas).

Orthognathus subparallelus (Chevrolat, 1880)

Material examined: 2 specimens. Brazil: Mato Grosso: Chapada dos Guimarães, Fazenda Buriti, 12-II-1982, M. Zanuto & W. Overal Colls (1). Pará: Benevides, PA-408, km 06, flight trap, 1-V-1981, I.S. Gorayeb Coll. (1)

Occurrence (MPEG Collection): Brazil: Mato Grosso (Chapada dos Guimarães); Pará (Benevides).

Rhinostomina

Rhinostomus Rafinesque, 1815

Rhinostomus barbirostris (Fabricius, 1775)

Material examined: 47 specimens. Brazil: Acre: Rio Branco, 25-X to 8-XI-1991, F.F. Ramos & A. Henriques Colls (1). Amapá: [Laranjal do Jari], Cachoeira Aurucuotapá, Rio Jari, 18-VIII-1961, W. Egler Coll. (1); Laranjal do Jari, BR-156, km 14, Rio Matapi, 26-XI-1981, Coleta luz U.V., I.S. Gorayeb Coll. (4). Maranhão: Lago Verde, 7-XI-1983, W. França Coll. (1); Lago Verde, Lago Rodrigues, 25-V-1979, M.F.

Torres Coll. (2). Mato Grosso: Serra dos [do] Bugres, Res. E. Serra das Araras, 24-I-1986, Armadilha Suspensa 1,6m (1). Pará: Belém, Ilha do Jutuba, 30-XI-1977, R. Ferreira Coll. (1); Belém, Campus MPEG, 3-II-1986, Sandoval Coll. (1); Belém, Campus MPEG, 11-III-1986, J. Dias Coll. (1); Belém, MPEG, 7-V-1974, B. Mascarenhas Coll. (1); Belém, Mocambo, 23-VII-1984, W.L. Occurrence (MPEG Collection): Brazil: Acre (Alto Purus); Amapá (Itaubal do Piririm, Macapá, Mazagão, Oiapoque); Amazonas (Manaus, Maraã, Presidente Figueiredo, Santa Isabel do Rio Negro); Maranhão (Buriticupu, Imperatriz, Lago Verde); Pará (Acará, Ananindeua, Belém, Benevides, Breves, Bujaru, Castanhal, Conceição do Araguaia, Melgaço, Moju, Ourilândia do Norte, Parauapebas, Peixe-Boi, Redenção, São João de Pirabas, São Miguel do Guamá, Tucuruí, Tracuateua); Rondônia (Candeias do Jamari, Ji-Paraná, Ouro Preto do Oeste).

Litosomina

Sitophilus Schoenherr, 1838

Sitophilus zeamais Motschulsky, 1855

Material examined: 11 specimens. Brazil: Amapá: [Oiapoque], Serra Lombard [Serra Lombarda], Limão, 15-VIII-1961, J. & B. Bechyné Colls (1); same but 25-VIII-1961 (1); Goiás: Corumbá de Goiás, 5-II-1962, J. & B. Bechyné Colls (1); Mato Grosso: Chapada dos Guimarães, 30-I-1961, J. & B. Bechyné Colls (1); same but, 5-II-1961 (1), 6-II-1961 (1); Cuiabá, 22-III-1961, J. & B. Bechyné Colls (1); Pará: Belém, 8-I-1961, J. & B. Bechyné Colls (1), 28-VI-1962, J. & B. Bechyné Colls (1); Benevides, 20-XI-1961, J. & B. Bechyné Colls (1); Santa Izabel [do Pará], 23-VI-1962, J. & B. Bechyné Colls (1).

Occurrence (MPEG Collection): Brazil: Amapá (Oiapoque); Goiás (Corumbá de Goiás); Mato Grosso (Chapada dos Guimarães, Cuiabá); Pará (Belém, Benevides, Santa Izabel do Pará).

Toxorhinus Lacordaire, 1866

Toxorhinus banonii (Guérin, 1844)

Material examined: 1 specimen. Brazil: Pará: Tucuruí, Rio Tocantins, Saúde, armadilha suspensa 2 m, 1-3-VI-1984 (1).

Occurrence (MPEG Collection): Brazil: Pará (Tucuruí).

Sphenophorina

***Belopoeus* Schoenherr, 1838**

***Belopoeus carmelita* Gyllenhal, 1838**

Material examined: 10 specimens. Brazil: Pará: Melgaço, Caxianã, ECFPn, 18-VIII-1998, em inflorescência de *Attalea maripa* (Aubl.) Mart., R.M. Valente Coll. (5); same but, 18-VIII-1998 (5).

Occurrence (MPEG Collection): Brazil: Pará (Melgaço).

***Belopoeus caudatus* Vanin, 1995**

Material examined: 2 specimens. Brazil: Pará: Melgaço, Caxianã, ECFPn, em inflorescência de *Attalea maripa*, 19-VIII-1998, R.M. Valente Coll. (2).

Occurrence (MPEG Collection): Brazil: Pará (Melgaço).

***Cactophagus* Le Conte, 1876**

***Cactophagus limulus* (Vaurie, 1967)**

Material examined: 2 specimens. Brazil: Pará: Belém, Utinga, 14-I-1954, W. França Coll. (1); Bujaru, Rodovia PA-140, km 26, 28-XII-1983, L.B. Albuquerque Coll. (1).

Occurrence (MPEG Collection): Brazil: Pará (Belém, Bujaru).

***Cactophagus strigosus* (Erichson, 1847)**

Material examined: 1 specimen. Brazil: Pará: Benevides, PA-408, km 06, 14-V-1981, E.L. Oliveira Coll. (1).

Occurrence (MPEG Collection): Brazil: Pará (Benevides).

***Cosmopolites* Chevrolat, 1885**

***Cosmopolites sordidus* (Germar, 1824)**

Material examined: 4 specimens. Brazil: Amapá: Mazagão, Camaipi km 14, 3-I-1980, E.L. Oliveira Coll. (1). Pará: Belém, 7-12-1960, Bechyné Coll. (1); Belém, 22-I-1963, F.C. Pinto Coll. (1); Belém, IAN, 26-X-1960, Inácio Coll. (1).

Occurrence (MPEG Collection): Brazil: Amapá (Mazagão); Pará (Belém).

***Cyrtomasius* Vanin, 1998**

***Cyrtomasius marluciae* Vanin, 1998 (Figure 1)**

Vanin, S. A. (1998). Revista Brasileira de Entomologia 42(3-4): 111-120.

Material type examined: 11 paratypes. MPEG COL 15009587, male: "Brasil Pará/ *C. grandiflora*/ Mocambo B11/ 03-IV-1987 [label 1], 0023 [label 2], *Cyrtomasius/ marluciae*/ Paratype ♂/ Vanin det. [label 3]". MPEG COL 15009588, male: "Brasil Pará/ Mocambo B38/1-II-1988 [label 1], Brasil Pará/ R. Santos [label 2], 0028 [label 3], *C. grandiflora* [label 4], *Cyrtomasius/ marluciae*/ Paratype ♂/ Vanin det. [label 5]". MPEG COL 15009589, male: "Brasil Pará/ Mocambo B38/28-I-1988 [label 1], Brasil Pará/ R. Santos [label 2], 0029 [label 3], *C. grandiflora* [label 4], *Cyrtomasius/ marluciae*/ Paratype ♂/ Vanin det. [label 5]". MPEG COL 15009590, female: "Brasil Pará/ Mocambo/ B32/ 17-XI-1987 [label 1], Brasil Pará/ M. Martins [label 2], 0021 [label 3], *C. grandiflora* [label 4], *Cyrtomasius/ marluciae*/ Paratype ♀/ Vanin det. [label 5]". MPEG COL 15009591, female: "Brasil Pará/ Mocambo/ B33/ 30-XI-1987 [label 1], Brasil Pará/ M. Martins [label 2], 0019 [label 3], *C. grandiflora* [label 4], *Cyrtomasius/ marluciae*/ Paratype ♀/ Vanin det. [label 5]". MPEG COL 15009810, male: "Brasil Pará Belém/ Mocambo/ B34/ 07-XII-1987 [label 1], Brasil Pará/ M. Martins [label 2], *C. grandiflora* [label 3], *Cyrtomasius/ marluciae*/ Paratype ♂/ Vanin det. [label 4], MPEG [label 5, light blue]". MPEG COL 15009811, male: "Brasil Pará/ Mocambo/ B32/ 17-XI-1987 [label 1], Brasil Pará/ M. Martins [label 2], *C. grandiflora* [label 3], *Cyrtomasius/ marluciae*/ Paratype ♂/ Vanin det. [label 4], MPEG [label 5, light blue]". MPEG COL 15009812, male; MPEG COL 15009813, male; MPEG COL 15009814, female, MPEG COL 15009815, female: "Brasil Pará/ Marajó-Breves/ Rio Caruacá/ 22-II-1988 [label 1], Américo/*Clusia* - sp. [label 2], *Cyrtomasius/ marluciae*/ Paratype ♂/ Vanin det. [label 3], MPEG [label 4, light blue]".

Remarks: specimens pinned. Labels of identification rectangular, red, hand printed ink black. In the publication by Vanin (1998) is not mentioned that the paratype MPEG COL 15009588 is deposited at MPEG. In the Entomological

Collection of the MPEG, all specimens received label with the follow: "Coleoptera: Polyphaga/ Curculionoidea: Curculionidae/ Rhynchophorinae/ *Cyrtomasius marluciae*/ Reincorporação: 4/XI/1998".

Additional material examined: 5 specimens. Brazil: Pará: Belém, Utinga, 15-II-1965, H. Shubart Coll. (1); Belém, Utinga, 27-XII-1977, A.Y. Harada Coll. (1); Santa Bárbara, [?]II-1965, A. Souza Coll. (3).

Occurrence (MPEG Collection): Brazil: Pará (Belém, Breves, Santa Bárbara).

Foveolus Vaurie, 1968

Foveolus anomalus Vaurie, 1968

Material examined: 9 specimens. Brazil: Pará: Tucuruí, 20-VI-1980, Palmeira Inajá, B. Mascarenhas Coll. (1); Tucuruí, Rio Tocantins, Canoal, 13-III-1984, palmeira inajá, W.L. Overal Coll. (2); Tucuruí, Rio Tocantins, Canoal, 16-III-1984, em palmeira, W.L. Overal Coll. (1); Tucuruí, Rio Tocantins, margem esquerda, Canoal, 16-III-1984, W.L. Overal Coll. (3); Tucuruí, Rio Tocantins, Jacundá, 16-III-1984, W. França Coll. (1); Tucuruí, Rio Tocantins, Rio Arapari, 2-III-1984, W.L. Overal Coll. (1)

Occurrence (MPEG Collection): Brazil: Pará (Tucuruí).

Foveolus maculatus O'Brien, 2003 (Figure 2)

O'Brien, C. (2003). Transactions of the American Entomological Society 129(2): 329.

Material type examined: 3 paratypes, sex not determined. MPEG COL 15009601: "BRASIL-PARÁ/ EMBRAPA – A. oriental/ Col.: R.N. MEDEIROS/ 3/IX/1996 [label 1], *Foveolus maculatus*/ n. sp. O'Brien, 2003 [label 2], TRONCO DE AÇAÍ [label 3] 15003 [label 4] PARATYPE [label 5]". MPEG COL 15009602: same data. MPEG COL 15009603: "BRASIL-PARÁ/ EMBRAPA – CPATU/ A.A. SILVA / Data: 7/10/1997 [label 1], Açaí [label 2], 1503 [label 3], *Foveolus maculatus*/ n. sp. O'Brien, 2003 [label 4], PARATYPE [label 5]".

Remarks: specimens pinned. Labels of paratype rectangular, red, printed. Labels of identification white,

hand printed. In the publication by O'Brien (2003) is not mentioned that exactly these two paratypes are deposited at MPEG.

Occurrence (MPEG Collection): Brazil: Pará (Belém).

Metamasius Horn, 1873

Metamasius anceps (Gyllenhal, 1838)

Material examined: 1 specimen. Brazil: Acre: Porto Acre, Humaitá, Mata de Terra Firme, 15-VI to 2-VII-1992, I.S. Gorayeb & J.A. Pena Colls (1).

Occurrence (MPEG Collection): Brazil: Acre (Porto Acre).

Metamasius cinnamominus (Perty, 1832)

Material examined: 68 specimens. Brazil: Amazonas: [Santa Isabel do] Rio Negro, B. Cauaburi, 28-I-1963, J. & B. Bechyné Colls (1). Pará: Acará, Ilha do Combu, 15-VIII-1989, R.B. Neto Coll. (1), 16-VIII-1989 (7), 17-VIII-1989 (9); Acará, Ilha do Combu, 1-X-1989, Armadilha de Luz, R.B. Neto Coll. (3); Belém, 4-V-1991 (1); Belém, Campus MPEG, 23-II-1987, M. Zanuto Coll. (1); Belém, Fazenda Velha, 18-VIII-1970, T. Pimentel Coll. (1); Belém, IAN, 26-X-1960, Inácio Coll. (1); Belém, Mosqueiro, 22-VII-1989, R.M. Valente Coll. (1); Belém, Mosqueiro, 24-25-V-1997, M.L.J. Macambira Coll. (1); Bujaru, 21-I-1979, R.B. Neto Coll. (1), 20-IV-1979, (5), 21-IV-1979 (9); Conceição do Araguaia, 17-21-XI-1979, W. França Coll. (2); same but, R.B. Neto Coll. (2); [without municipality], São José do Capim, 12-V-1977, F.S. Chagas (1)*; Tucuruí, 5-VI-1978, R.B. Neto Coll. (1); Tucuruí, 5-VII-1978 (1); same but, R.B. Neto Coll. (8), P. Tadeu Coll. (4); Tucuruí, 5-VIII-1978, R.B. Neto Coll. (3); Tucuruí, 7-V-1979 (1); Tucuruí, Rio Tocantins, Ilha Tocantins, 28-VII-1984, B. Mascarenhas Coll. (3).

Occurrence (MPEG Collection): Brazil: Amazonas (Santa Isabel do Rio Negro); Pará (Acará, Belém, Bujaru, Conceição do Araguaia, Tucuruí).

Metamasius crustosus Vaurie, 1966

Material examined: 8 specimens. Brazil: Maranhão: Lago Verde, 2-II-1983, W. França Col (1). Pará: [without

municipality, without date] (1)*; Belém, 1-VIII-1979, E. Melo Coll. (1); Belém, km 07, E.F.B., 21-X-1960, Inácio Coll. (1); Belém, Mosqueiro, 10-III-1990, C.N. Oliveira Coll. (1); Bujaru, 21-IV-1979, R.B. Neto Coll. (2); Conceição do Araguaia, 17-21-XI-1979, W.L. Overal Coll. (1).

Occurrence (MPEG Collection): Brazil: Maranhão (Lago Verde); Pará (Belém, Bujaru, Conceição do Araguaia).

Metamasius hemipterus (Linnaeus, 1758)

Material examined: 390 specimens. Brazil: Acre: Porto Acre, Humaitá, Mata de Terra Firme, 15-VI to 2-VII-1992, I.S. Gorayeb & J.A. Pena Colls (1); Rio Branco, 25-X to 8-XI-1991, F.F. Ramos & A. Henriques Colls. (1). Amapá: [Ferreira Gomes], Floresta IBDF [Floresta Nacional do Amapá], Rede, 19-II-1981, I.S. Gorayeb Coll. (1)*; Mazagão, Camapi, km 14, 3-I-1980, E.D. Coll. (1); [Oiapoque], [Vila Velha do] Cassiporé, [?]-[?]-1939 (1). Amazonas: Itacoatiara, 30 km W, Rio Urubú, floresta primária, *sweeping, day*, 13-I-1981, Robert Davidson Coll. (1); Itacoatiara, 30 km W, Rio Urubú, floresta primária, *sweeping, day*, 15-I-1981, Robert Davidson Coll. (1); [Santa Isabel do] Rio Negro, B. Cauaburi, 28-I-1963, J. & B. Bechyné Colls (5). Goiás: Itaguari, [?]-IV-1936 (1). Mato Grosso: Chapada dos Guimarães, 20-I-1961, J. & B. Bechyné Colls (1). Pará: [without municipality] R. Ariranha, Trombetas, 8-10-193 [8-X-1903?], Ducke Coll. (1); Acará, Ilha do Combu, 11-VIII-1989, R.B. Neto Coll. (1); same but, 12-VII-1989 (8), 15-VII-1989 (15), 16-VII-1989 (12); Acará, Ilha do Combu, 15-VIII-1989, Armadilha de luz, R.B. Neto Coll. Occurrence (MPEG Collection): Brazil: Acre (Porto Acre, Rio Branco); Amapá (Ferreira Gomes, Mazagão, Oiapoque); Amazonas (Itacoatiara, Santa Isabel do Rio Negro); Goiás (Itaguari); Mato Grosso (Chapada dos Guimarães); Pará (Acará, Barcarena, Belém, Benevides, Breves, Bujaru, Conceição do Araguaia, Limoeiro do Ajuru, Melgaço, Moju, Ourilândia do Norte, Parauapebas, Primavera, Óbidos, Tucuruí); Paraíba (João Pessoa); Rondônia (Ouro Preto do Oeste).

Metamasius tectus Vaurie, 1966

Material examined: 10 specimens. Brazil: Acre: Porto Acre, Humaitá, Mata de Terra Firme, 15-VI to 2-VII- 1992, I.S. Gorayeb & J.A. Pena Colls (1). Amazonas: São Gabriel da Cachoeira, Maturacá, Rio Negro, 9-I-1963, J. & B. Bechyné Colls (1). Pará: Acará, Ilha do Combu, 16-VIII-1989, R.B. Neto Coll. (4), same but, 28-VIII-1989 (1); Belém, Utinga, 28-V-1977, A.Y. Harada Coll. (1); Tucuruí, Rio Tocantins, Ilha Tocantins, 28-VII-1984, B. Mascarenhas Coll. (1). Rondônia: Ouro Preto do Oeste, Estrada Rio Santa Helena, 23-III-1985, M.F. Torres (1).

Occurrence (MPEG Collection): Brazil: Acre (Porto Acre); Amazonas (São Gabriel da Cachoeira); Pará (Acará, Belém, Tucuruí); Rondônia (Ouro Preto do Oeste).

Metamasius tuberculippectus Hustache, 1936

Material examined: 7 specimens. Brazil: Amazonas: Santo Antônio do Içá, 4-IX-1906, Ducke Coll. (1); São Gabriel da Cachoeira, Maturacá, Rio Negro, 6-I-1963, J. & B. Bechyné

Colls (1); same but, 9-I-1963 (1), 12-I-1963 (1), 16-I-1963 (1).
Pará: Almerim, Monte Dourado, 2-VI-1979, I.S. Gorayeb Coll. (1); Belém, Mocambo, 26-VI-1977, W.L. Overal Coll. (1).

Occurrence (MPEG Collection): Brazil: Amazonas (Santo Antônio do Içá, São Gabriel da Cachoeira); Pará (Almerim, Belém).

Metamasius spp.

Material examined: 7 specimens. Brazil: Amazonas: São Gabriel da Cachoeira, Maturacá, Rio Negro, 6-I-1963, J. & B. Bechyné Colls (1); same but, 12-I-1963 (1). Pará: Acará, Ilha do Combu, 26-X-1989, R.B. Neto Coll. (1); Belém, Mocambo, 5-IV-1990, J. M. da Rocha Coll. (1); Benevides, 22-IV-1978, L. Texurie Coll. (1); Tucuruí, Rio Tocantins, 23-XII a 7-XII-1986, N. Degallier Col., Arm.[armadilha de] intercepção (2).

Paramasius Kuschel, 1958

Paramasius cristulatus Vanin, 1998 (Figure 3)

Material type examined: holotype, MPEG COL 15009592, male: "Brasil Pará/ Mocambo/ C55/ 20-XII-1990 [label 1], Brasil Pará/ F.F. Ramos [label 2], 0010 [label 3] *Paramasius/ cristulatus*/ Holotype ♂/ Vanin det. [label 4]". 4 paratypes. MPEG COL 15009593, male: Brasil Pará/ Mocambo/ D06002/ 02-III-1991 [label 1], Brasil Pará/ F.F. Ramos [label 2], 0004 [label 3] *Paramasius/ cristulatus*/ Paratype ♂/ Vanin det. [label 4]". MPEG COL 15009594, female: "Brasil Pará Belém/ Mocambo/ E35015/ 26-V-1992 [label 1], Brasil Pará/ M. Martins [label 2], 0037 [label 3] *Paramasius/ cristulatus*/ Paratype ♀/ Vanin det. [label 4]". MPEG COL 15009595, female: "Brasil Pará/ Marajó - Breves/ Rio Caruacá/ 22-II-1988 [label 1], Américo/ Clusia – sp. [label 2], 0011 [label 3] *Paramasius/ cristulatus*/ Paratype ♀/ Vanin det. [label 4]". MPEG COL 15009596, male: "Brasil AM/ Manaus PDBFF/ R 1202 n8/ M. Martins 1986 [label 1], 0012 [label 2], *Paramasius/ cristulatus*/ Paratype ♀/ Vanin det. [label 3]".

Remarks: specimens pinned. Labels of identification rectangular, red, hand printed ink black. In the Entomological

Collection of the MPEG, all specimens received label with the follow: "Coleoptera: Polyphaga/ Curculionoidea: Curculionidae/ Rhynchophorinae/ *Cyrtomasius marluciae*/ Reincorporação: 4/XI/1998".

Additional material examined: 7 specimens. Brazil: Amapá: [Oiapoque], Serra Lombard [Serra Lombarda], Limão, 21-VIII-1961, J. & B. Bechyné Coll. (1), same but, 24-VIII-1961 (1).

Occurrence (MPEG Collection): Brazil: Amazonas (Manaus); Amapá (Oiapoque); Pará (Belém, Breves).

Paramasius distortus (Gemminger & Harold, 1871)

Material examined: 18 exemplares. Brazil: Amapá: Mazagão, Fazendinha, 9-XI-1978, W. França Coll. (1). Mato Grosso: Chapada dos Guimarães, Fazenda Buriti, 6-III-1982, M. Zanuto & W.L. Overal Colls (1). Pará: Acará, Ilha do Combu, 12-VIII-1989, R.B. Neto Coll. (3); Altamira, 8-22-IV-1988, N. Degallier Coll. (1); Barcarena, Ilha das Onças, 6-III-1977, W.L. Overal Coll. (1); Belém, Fazenda Velha, 14-V-1977, M.F. Torres Coll. (1); Belém, Mocambo, 21-III-1978, M.F. Torres Coll. (1); Belém, Mocambo, *C. grandiflora*, 9-IX-1987 (1); Benevides, Fazenda Morelândia, 5-III-1987, J. Dias Coll. (1); same but, 6-III-1987 (3); Santa Bárbara, [?]V-1964, W. França Coll. (2); São Miguel do Guamá, 24-III-1964, Apol. Souza Coll. (1); Belém-Brasília, km 90, F. Jabotí, 23-VII-1972, M. Helena Coll. (1)*.

Occurrence (MPEG Collection): Brazil: Amapá (Mazagão); Mato Grosso (Chapada dos Guimarães); Pará (Acará, Altamira, Barcarena, Belém, Benevides, Santa Bárbara, São Miguel do Guamá).

Rhodobaenus Le Conte, 1876

Rhodobaenus rufirostris (Hustache, 1936)

Material examined: 8 specimens. Brazil: Mato Grosso: Chapada dos Guimarães, 6-II-1961, J. & B. Bechyné Colls (2). Pará: Parauapebas, Pojuca (2); Parauapebas, Caldeirão (1); Rondônia: Ouro Preto do Oeste, Margem esquerda Rio Sta. Helena, 20-III-1985, M.F. Torres Coll. (2); Ouro Preto do Oeste, Sítio Nova Lima, 22-III-1985, M.F. Torres Coll. (1).

Occurrence (MPEG Collection): Brazil: Mato Grosso (Chapada dos Guimarães); Pará (Parauapebas); Rondônia (Ouro Preto do Oeste).

Sphenophorus Schoenherr, 1838

Sphenophorus sp. 1

Material examined: 1 specimen. Brazil: Pará: Acará, 8-XII-1977, R.B. Neto Coll. (1).

Sphenophorus sp. 2

Material examined: 1 specimen. Brazil: Rondônia: Ji-Paraná, [Fazenda Sinueira] n84508, 27-VIII-1985, W.L. Overal Coll. (1).

CONCLUSION

The material examined in the Entomological Collection at *Museu Paraense Emílio Goeldi* represents a temporal and spatial record of Amazonian Dryophthorinae, including specimens collected in the early 1900s' and from regions already affected by human intervention. Additionally, this Collection includes the type specimens of three species of Dryophthorinae and the first recorded of the genus *Rhodobaenus* Le Conte, 1876 from Brazilian Amazon. Currently, 50% of the richness of the Dryophthorinae recorded from Brazilian Amazon is present in the Collection. This study highlights the importance of identifying and inventorying the material deposited in biological collections.

ACKNOWLEDGMENTS

We are thanks to Dr. Orlando Tobias Silveira, curator of the Entomological Collection of the *Museu Paraense Emílio Goeldi*, for granted complete access to the Collection; Augusto Quaresma and José Orlando Dias, for assistance in the Collection; MSc. Ronildon Miranda dos Santos for help with the map; MSc. Gustavo Costa Tavares for help with the illustrations; Dr. Bruno Augusto Souza de Medeiros for reviewing an earlier version of the manuscript and review English text. Our appreciation goes to the *Museu Paraense Emílio Goeldi* for providing facilities and access to the Entomological Collection.
